
Minimum Error Entropy Classification

learning theory approach to minimum error entropy criterion - minimum error entropy respectively. the empirical mee is implemented by minimizing these computable quantities. though the mee principle has been proposed for a decade and mee algorithms have been **quantized minimum error entropy criterion - arxiv** - 2 entropy $h\alpha(e)$. the argument of the logarithm in $h\alpha(e)$, called information potential (ip), is $i\alpha(e) = z p\alpha(e) de = e p\alpha - 1(e)$ (4) since the logarithm function is a monotonically increasing **a fixed-point minimum error entropy algorithm** - a fixed-point minimum error entropy algorithm seungju han, jose principe cnel, department of electrical and computer engineering, university of florida, gainesville, usa **normalized minimum error entropy algorithm with recursive ...** - entropy 2016, 18, 239 3 of 13 algorithm has been developed based on minimization of $e^2 k$ [9]e minimization of $e^2 k$ can be carried out by the steepest descent method utilizing the gradient of e^2 **a normalized minimum error entropy stochastic algorithm** - a normalized minimum error entropy stochastic algorithm seungju han, sudhir rao, kyu-hwa jeong, jose principe cnel, department of electrical and computer engineering, university of florida ... **a modified pca based on the minimum error entropy - ntnu** - [5] h. wang , "minimum entropy control of non-gaussian dynamic stochastic system", iee transactions on automatic control, vol.47, febr. 2002, pp. 398-403. **minimum error entropy luenberger observer** - the parametric definition of renyi's entropy provides extra freedom to the designer. most commonly used and easy to evaluate is the quadratic entropy, which is given by **convergence properties and data efficiency of the minimum ...** - 1966 iee transactions on signal processing, vol. 51, no. 7, july 2003 convergence properties and data efficiency of the minimum error entropy criterion in adaline ... **kernel minimum error entropy algorithm - gr.xjtu** - nonlinear systems, namely, the information theoretic learning (itl) [12]. in a recent paper [19], we have applied the maximum correntropy (mc) criterion to kernel adaptive filtering, and devel- **insights into the robustness of minimum error entropy ...** - an unknown scalar parameter that needs to be estimated. the observed output (desired response) at instant i is $d_i = w^T x_i + v_i$ (1) where x_i is the true but unobserved input of the unknown **minimum entropy clustering and applications to gene ...** - minimum entropy (measured on a posteriori probabilities) criterion, which is the conditional entropy of clusters given the observations. fano's inequality indicates that it could be a good criterion for clustering.
